## RED RIVER

SULTANS OF STRING/Symphony: So, imagine Bond was four guys instead of four young, hotties that merrily did what the producer told them. Then add a few well deserved Junos to the mix. Then let them keep reinvesting in their sound, production, presentation and chops. Not that we didn't love Bond, but this is the real deal for real musos. Taking their world roots vision and adding members of the Toronto Symphony for a new fusion of roots (taken very loosely and on a world wide basis) and classical, you better believe the results are mind blowing. Even though the instrumentation is different, you get the feeling this is Strunz & Farah or Willie & Lobo or Gypsy Kings taken to the next level of the game, sometimes all at once. Meaty, juicy, full blooded adult listening, any fan of world beat or contemporary instrumental music is sure to absolutely flip for this gem. Hot stuff throughout and a sure bet to notch another Juno and any other award winning hardware to come it's way. Check it out.
